

QS-D MILLIMETER Grade Pipe Diameter Gauge

Essential Tool for Trenchless Rehabilitation

Main Parameters

QS-D Pipeline Diameter Gauge Parameter Table	
Applicable Pipeline Diameter	DN200-DN1100、DN400-DN2000
Measurement Accuracy	±2mm
Downhole Rod	Carbon fiber telescopic rod, standard 7m length, extendable options available
Measuring Rod	Carbon fiber telescopic rod, maximum length 1m
Protection Rating	IP68
Acquisition Frequency	60rpm, 1000 points/second
Imaging System	1/2.8" CMOS image sensor, 2MP; Field of view 180°*180°
Lighting	4 x 3W LED lamps, continuously adjustable brightness
Operating Temperature	-10°C to 50°C
Weight	6.5kg
Battery	2 standard batteries, single battery continuous operation time 4h
Reserved Aviation Plug Interface	For interchangeable probes

Product Introduction

The QS-D Pipeline Diameter Gauge is a millimeter-level intelligent inspection device capable of accurately and rapidly measuring core parameters such as pipeline diameter. It delivers exceptional measurement accuracy of $\pm 2\text{mm}$ with a remarkably small error margin within 0.2%, providing highly precise data support for pipeline rehabilitation design.

Employing a high-precision laser probe, the system performs 360° scans to rapidly acquire high-density inner wall data. It accurately measures internal diameter and sediment levels for the inspection and structural assessment of various pipelines, including municipal, industrial, and oil & gas types.

Accuracy Calibration Results

Utility Model Patent
Patent No.: 2025221991243

Technical Highlights

Millimeter-Level
Precision

360° continuous scanning acquires 1000 data points per scan. Measurement accuracy reaches $\pm 2\text{mm}$ with error within 0.2%, providing precise data support for pipeline rehabilitation design.

Pipeline Type Agnostic
Multi-Scenario
Applicability

Accurately measures diverse pipeline shapes (circular, oval, egg-shaped, rectangular) within a DN300-2000mm range. Essential for high-precision tasks including new pipe acceptance, pipeline mapping, and rehabilitation design.

Lightweight & Portable
Single-Person
Operation

Lightweight at 4.5 kg for easy one-handed portability and single-person operation. Includes a standard 7-meter telescopic rod (extendable) that folds for compact storage.

Intelligent & User-Friendly
Long Battery Life

With real-time HD imaging for rapid positioning, it measures pipe diameters in a single operation and displays data instantly. The system supports multiple data export formats and offers up to 8 hours of continuous operation with its dual-battery design.

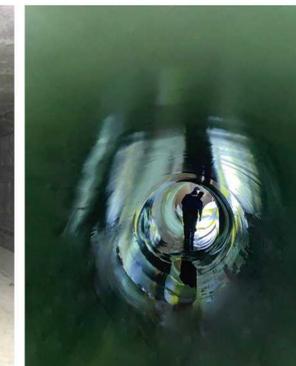

Application Scenarios

Municipal Drainage

Drainage Box Culverts

Rehabilitation Design

New Pipe Acceptance
